

# Weekly Report

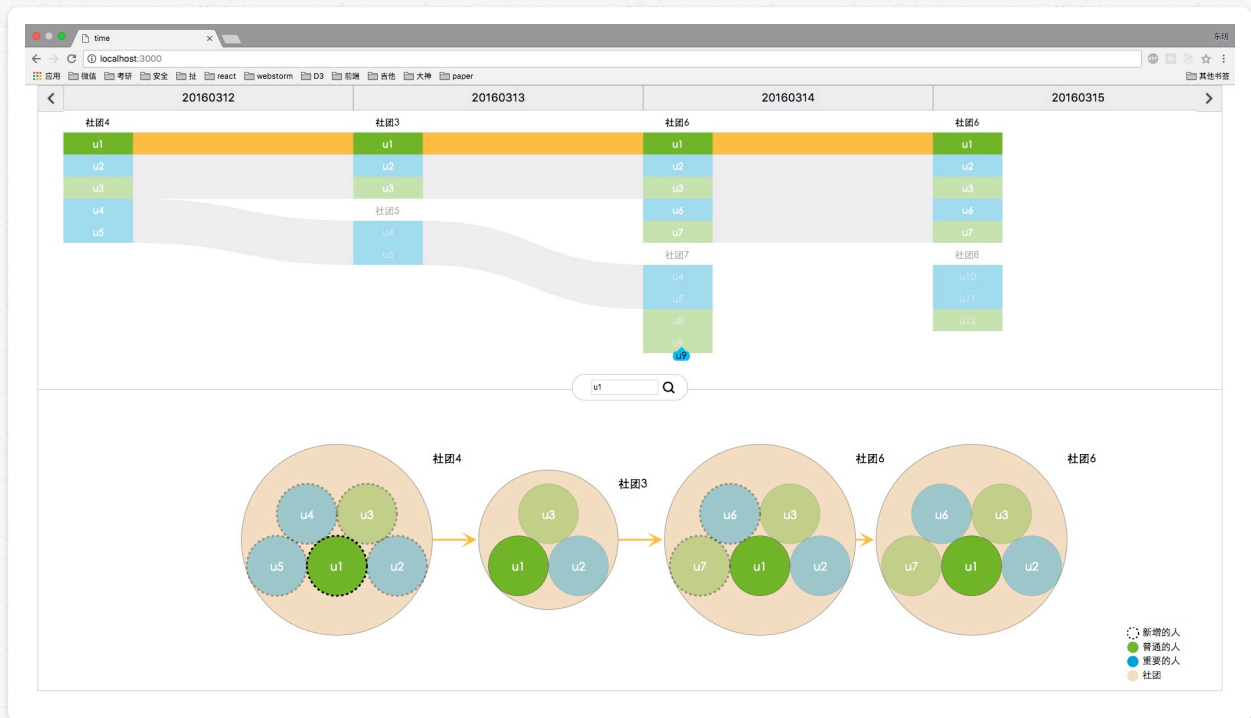

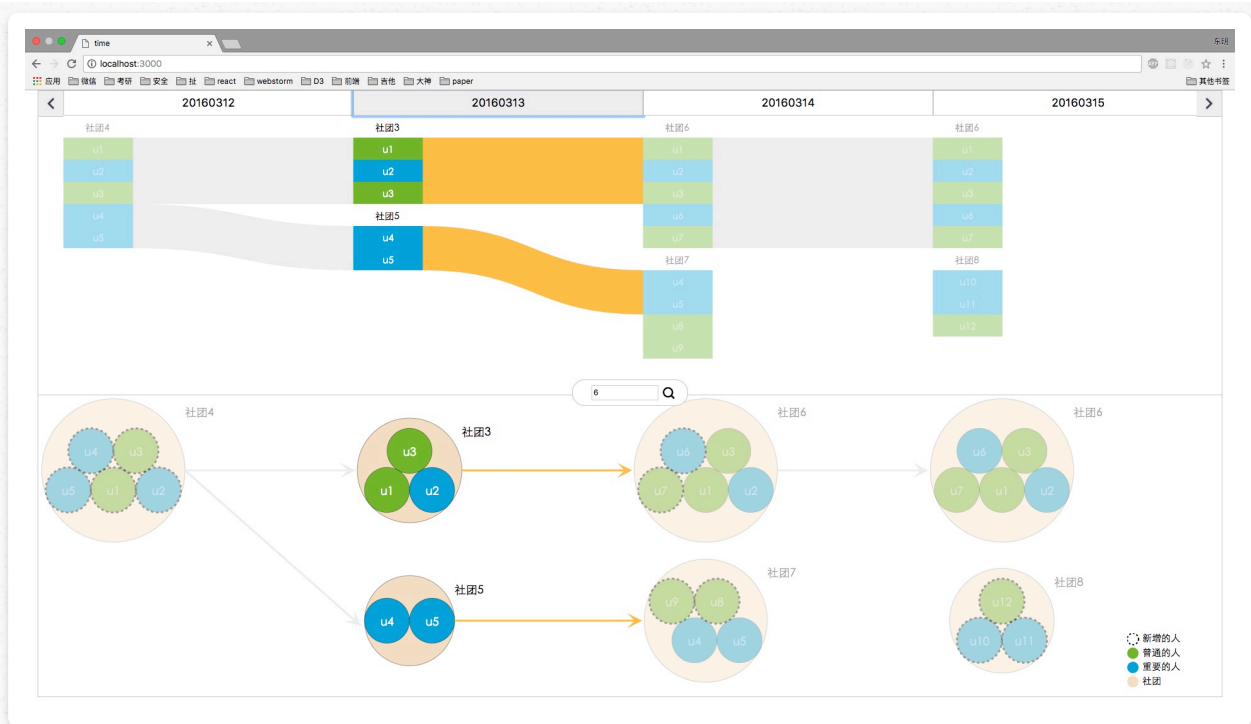

14/11/2016-20/11/2016

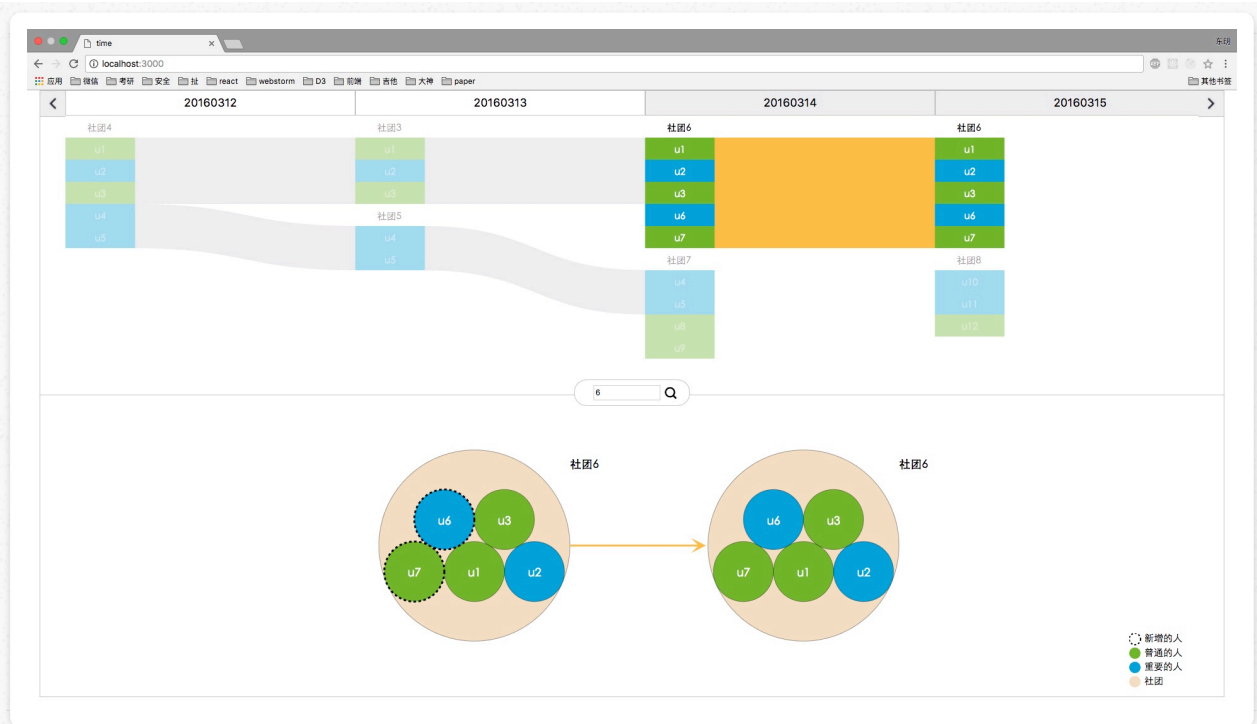

Han Dongming Nov. 20 2016

## Work

1. Do the organization revolution of the Hua Wei project again and again.

2. Write notes of the code.
3. Write test report.
4. Read paper

## *Magnostics: Image-based Search of Interesting Matrix Views for Guided Network Exploration*

### To do

1. Do the paper report.
2. Finish Hua Wei project.
3. To do following project with Dr. Guo.

### Felling

Code is not a boring thing and code shouldn't have made me agitated, with increase and variable requirements, I fell very unhappy, but I have done it at last, and I really do not want to code the project again.

Read paper is not very interesting maybe because of the paper, there are lots of words what I don't know. This paper show a new way to explore network. and after a few days I will upload the PPT to explain what I mean and my felling after reading it.
